

Description

BillPort™ is Invoice Insight's proven technology platform for Telecom Expense Management (TEM). Delivered using a 100% Web-based approach, BillPort provides customers with a tool for managing their end-to-end telecom spending across all telecom products and services.

BillPort	Telecom Service Type
✓	Local Voice
✓	Long Distance Voice
✓	Data
✓	Wireless
✓	Equipment & Device Charges
✓	Conferencing
✓	Calling Card
✓	Installation & Repair Services

BillPort will arm your enterprise with the tools and visibility to control your telecom spending. BillPort's extensive capabilities allow customers to realize cost savings that result from the management and reduction of telecom expenses combined with streamlined processes and administrative requirements. In addition, Invoice Insight combines BillPort with a flexible, on-demand approach to services, which allows Invoice Insight to "right-size" the TEM solution delivery to each customer's unique environment and requirements.

Capabilities

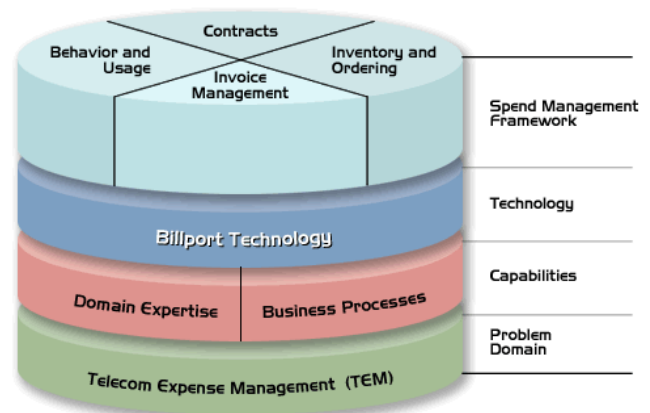

BillPort enables the following four key elements of expense management to drive customer savings:

- Invoice Management,
- Inventory and Ordering,
- Contracts, and
- Behavior and Usage.

Invoice Management

BillPort automates and streamlines the invoice receipt-to-payment process and the supporting processes related to validation, cost allocation, dispute management, reporting, and analysis. This technical and operational foundation is central to an organization's TEM Solution. Supported areas include

- Invoice receipt,
- Scanned images of paper invoices,
- Data capture (paper or e-bills),
- Cost allocation and approval workflow,
- Invoice approval processes,
- Invoice validation,
- Dispute management,
- Data storage and retrieval, and
- Reporting and analytics.

BillPort™: Telecom Expense Management Framework

Inventory and Ordering

BillPort's Ordering and Inventory Modules fully integrate with the Invoice Management Module to capture change, adjust baseline inventory, and identify billing exceptions. Sophisticated analysis and visualization tools also use inventory analysis to identify and enable more savings. BillPort empowers analysts to understand the details of an organization's expenses in ways that are not possible with manual processes.

BillPort's integrated procurement tools enable organizations to update inventory proactively and facilitate telecom service moves, additions, and changes with their vendors. If a third-party OSS or provisioning tool is in use, Invoice Insight can integrate that system with BillPort to minimize disruption and maximize results.

Contracts

BillPort gives users the visibility and analytical tools to understand their telecom expenses and to leverage that information during negotiations with vendors. New or existing contracts can be entered into BillPort, and BillPort's Contract Compliance module will validate recurring, non-recurring, and usage charges automatically, flagging discrepancies to ensure contract compliance.

Behavior and Usage

BillPort enables user-defined push reporting, automated pushed reporting, and hierarchical reporting. Reporting can be tailored to reflect service-specific, location-specific, cost center, and other designated business components. Like other BillPort modules, this flexible solution adapts easily to meet each customer's needs.

About Invoice Insight

Invoice Insight, LLC is headquartered in Northern Virginia with sales offices in Dallas, TX, Milwaukee, WI, and Princeton, NJ. Invoice Insight was founded in mid-2000 by a team of enterprise software architects, telecom industry subject matter experts, and management consultants. Invoice Insight provides Telecom Expense Management (TEM) solutions to medium and large businesses, federal government agencies, and leading cost management solution providers.

Key Benefits of Adopting BillPort™

- ✓ Leverage investments in AP, ordering, inventory, and call accounting systems.
- ✓ Reduce telecom expenses by proactively capturing, disputing, and eliminating erroneous invoice charges.
- ✓ Enforce contract compliance and reduce or eliminate off-contract buying of telecom assets.
- ✓ Reduce operational costs by streamlining invoice processing and accounts payable processes while eliminating redundant tasks and effort.
- ✓ Eliminate costly telecom audits by introducing a long-term, scalable solution that manages all of your enterprise's telecom needs in one place, on a proactive basis.
- ✓ Utilize on-demand and scheduled reporting to provide visibility and accountability within organizations and data analysis tools to identify savings, optimization opportunities, and areas for strategic sourcing.
- ✓ Manage inventory to ensure that your organization is utilizing the assets it has and is being charged only for the assets that you use.
- ✓ Streamline IT operations and reduce IT costs by using the 100% Web-based BillPort application, hosted and maintained by Invoice Insight.
- ✓ Deploy BillPort rapidly to any Internet-accessible location worldwide. No capital investment is required.
- ✓ Combine BillPort technology with on-demand services from Invoice Insight to create a solution that fits your organization's needs. BillPort enables flexible engagements.
